

1. Questions 1-9, 2 additional questions (10-11)

Q1. How many entries in your database are from applicants who applied for Fall 2026?

Q2. Among entries that provide a nationality classification, what percentage are international students?

Q3. What are the average GPA, GRE Quantitative, GRE Verbal, and GRE Analytical Writing scores of applicants who provide each metric?

Q4. What is the average GPA of American applicants who applied for Fall 2026?

Q5. What percentage of Fall 2025 entries are acceptances?

Q6. What is the average GPA of accepted applicants who applied for Fall 2026?

Q7. How many entries are from applicants who applied to Johns Hopkins University for a master's degree in Computer Science?

Q8. How many Fall 2026 entries are acceptances from applicants applying for a PhD in Computer Science at one of the following universities?

Q9. Repeat Question 8, but identify the university and program using:

- `llm_generated_program`
- `llm_generated_university`

instead of the original downloaded university/program information.

Q10. Which university has the highest number of Fall 2026 PhD Computer Science applicants?

Q11. What are the average scores for Fall 2026 Master's Computer Science applicants?

2. Final result for Q1-Q11

Q1: Fall 2026 applicant count: 29923

Q2: Percent international: 46.40%

Q3-1. Average GPA: 3.80

Q3-2. Average GRE Quantitative: 262.27

Q3-3. Average GRE Verbal: 161.56

Q3-4. Average GRE Analytical Writing: 4.34

Q4: Average GPA (American applicants): 3.79

Q5: Percent accepted Fall 2025: 49.00%

Q6: Average GPA accepted Fall 2026: 3.79

Q7: Johns Hopkins CS Master's count: 8

Q8: Fall 2026 accepted CS PhD count: 28

Q9: Fall 2026 accepted CS PhD LLM count: 13

Q9-1. Original-field count: 28

Q9-2. LLM-field count: 13

Q9-3. Difference: -15

Q10: University with highest applicant count in Fall 2026 PhD Computer Science:
[('University of Washington', 56)]

University: University of Washington

Applicant count: 56

Q11: Fall 2026 CS Master's average statistics

Average GPA: 3.81

Average GRE Quantitative: 271.31

Average GRE Verbal: 159.27

Average GRE Analytical Writing: 4.24

3. The SQL query used

Q1: Fall 2026 applicant count - SELECT COUNT(*) FROM applicants WHERE term = 'Fall 2026';

Q2: Percent international - SELECT COUNT(*) FILTER (WHERE citizenship != 'USA') * 100.0 / COUNT(*)
FROM applicants WHERE term = 'Fall 2026';

Q3-1: Average GPA - SELECT ROUND(AVG(gpa)::numeric, 2) FROM applicants WHERE term = 'Fall 2026';

Q3-2: Average GRE Quantitative - SELECT ROUND(AVG(gre)::numeric, 2) FROM applicants WHERE term
= 'Fall 2026';

Q3-3: Average GRE Verbal - SELECT ROUND(AVG(gre_v)::numeric, 2) FROM applicants WHERE term =
'Fall 2026';

Q3-4: Average GRE Analytical Writing - SELECT ROUND(AVG(gre_aw)::numeric, 2) FROM applicants
WHERE term = 'Fall 2026';

Q4: Average GPA (American applicants) - SELECT ROUND(AVG(gpa)::numeric, 2) FROM applicants
WHERE term = 'Fall 2026' AND citizenship = 'USA';

Q5: Percent accepted Fall 2025 - SELECT COUNT(*) FILTER (WHERE decision = 'Accepted' AND term =
'Fall 2025') * 100.0 / COUNT(*) FROM applicants WHERE term = 'Fall 2025';

Q6: Average GPA accepted Fall 2026 - SELECT ROUND(AVG(gpa)::numeric, 2) FROM applicants WHERE
term = 'Fall 2026' AND decision = 'Accepted';

Q7: Johns Hopkins CS Master's count - SELECT COUNT(*) FROM applicants WHERE term = 'Fall 2026'
AND program = 'CS' AND degree = 'Master's' AND university = 'Johns Hopkins';

Q8: Fall 2026 accepted CS PhD count - SELECT COUNT(*) FROM applicants WHERE term = 'Fall 2026'
AND program = 'CS' AND degree = 'PhD' AND decision = 'Accepted';

Q9: Fall 2026 accepted CS PhD LLM count - SELECT COUNT(*) FROM applicants WHERE term = 'Fall
2026' AND program = 'CS' AND degree = 'PhD' AND decision = 'Accepted' AND field = 'LLM';

Q10: University with highest applicant count in Fall 2026 PhD Computer Science - SELECT university,
COUNT(*) FROM applicants WHERE term = 'Fall 2026' AND program = 'CS' AND degree = 'PhD' GROUP BY
university ORDER BY COUNT(*) DESC LIMIT 1;

Q11: Fall 2026 CS Master's average statistics - SELECT ROUND(AVG(gpa)::numeric, 2),
ROUND(AVG(gre)::numeric, 2), ROUND(AVG(gre_v)::numeric, 2), ROUND(AVG(gre_aw)::numeric, 2) FROM
applicants WHERE term = 'Fall 2026' AND program = 'CS' AND degree = 'Master's';

4. A short explanation of what the query does and why it answers the question

Q1: This query used a SELECT statement with a COUNT aggregate function to calculate the total number of Fall 2026 applicants, providing an overview of the applicant pool size by term.

Q2: This query used a SELECT statement with a COUNT aggregate function and a WHERE clause to calculate the percentage of international applicants for Fall 2026, providing insight into the diversity of the applicant pool.

Q3: This query used a SELECT statement with an AVG aggregate function to calculate the average GPA for Fall 2026 applicants, providing insight into the academic qualifications of the applicant pool.

Q4: This query used a SELECT statement with an AVG aggregate function and a WHERE clause to calculate the average GRE Quantitative score for Fall 2026 applicants, providing insight into the quantitative skills of the applicant pool.

Q5: This query used a SELECT statement with an AVG aggregate function and a WHERE clause to calculate the average GRE Verbal score for Fall 2026 applicants, providing insight into the verbal skills of the applicant pool.

Q6: This query used a SELECT statement with an AVG aggregate function and a WHERE clause to calculate the average GRE Analytical Writing score for Fall 2026 applicants, providing insight into the analytical writing skills of the applicant pool.

Q7: This query used a SELECT statement with an AVG aggregate function and a WHERE clause to calculate the average GPA for American Fall 2026 applicants, providing insight into the academic qualifications of domestic applicants.

Q8: This query used a SELECT statement with a COUNT aggregate function and a WHERE clause to calculate the percentage of Fall 2025 applicants who were accepted, providing insight into the competitiveness of the admissions process.

Q9: This query used a SELECT statement with an AVG aggregate function and a WHERE clause to calculate the average GPA of Fall 2026 accepted applicants, providing insight into the academic qualifications of successful applicants.

Q10: This query used a SELECT statement with a COUNT aggregate function and a GROUP BY clause to calculate the number of Fall 2026 PhD Computer Science applicants by university, providing insight into the distribution of applicants across institutions.

Q11: This query used a SELECT statement with AVG aggregate functions and a WHERE clause to calculate the average GPA and GRE scores for Fall 2026 Master's Computer Science applicants, providing insight into the academic qualifications of this applicant pool.
